

- Nationally ranked and still forgotten about. Last Long Range Facilities Master Plan had zero VAPA projects. Have to do the same thing for band concerts.

### Stadiums

- There are 5 schools without stadiums.
- Priority is determined by funding and how important it is to the community. The District, if and when, they do stadiums, it will be all at once, not site by site.
- Stadiums aren't just for the athletes. Every time the band travels to a home game they lose an entire day of instruction. Loading in, loading out. No busses for students after the game, forcing parents have to pick up their students from the game. Some students aren't getting home until midnight, for a **HOME** game.
- Stadiums are for the community. Stadium gives the students a "home". Kids don't show up for games due to the travel. It's not just a sports facility.
- Stadiums are an equitable opportunity.
- Laguna and Valley travel to non EGUSD school sites for home games. They don't feel safe leaving the EGUSD District boundaries.
- Students don't go to their home schools because they have no sense of home. Kids are interdistrict transferring to go to schools with new facilities and stadiums because it gives them a sense of home.

### Equity

- New school received projectors, old schools are still using chalkboards.
- New schools are easier to upgrade and that is why they sometimes tackled first. Older schools take more resources to bring up to equitable standards.
- Update the Districts oldest schools
- Everyone is not treated fairly. What improvements have been made to Florin and Valley? Certain schools get more favoritism than other schools.
- Programs – sports, career pathways, vapa,- not equitable across the district. Need to use the gymnasium because there are spaces for these programs. Classrooms are outdated
- 

### Questions/Discussion

- How/Who determines who gets what and when?
  - FCA – Priorities
  - Educational Adequacy
  - Infrastructure, IT, Equity
- Laguna Creek HS & Sheldon HS will be under going modernization next.
- Do operational constraints play into how far you want to reach in the Masterplan?
  - No, there is no thought to the operations. "If you build it, they will come"
- What kind of priority do you put on something a school doesn't have?
  - Depends on the situation...
- The community will not have the opportunity to see the masterplan before it goes to the board.
- What goes in front of the board in March is not the final-final. It will just be the list of projects. That will be an opportunity to provide feedback.
  - The next steps haven't been defined yet.

- How long will the changes take effect at the school?
  - 3-4 years
- The AC is failing at Florin HS. Facilities don't know anything about it.
- The restrooms need reconstruction. The restrooms are bad.
- It is hard to learn in an environment that is *decomposing*. To learn in an environment that isn't falling apart.
- How far are you willing to take the students point of view?
  - The students point of view is very important to the District
- Every campus needs a restrooms for students with disabilities and different needs. Restrooms with a changing table, a hoist, space for wheelchair, enough room for a chaperone.
- Prop 28 – VAPA
  - Will Prop 28 be taken into consideration in the Masterplan?

## Response history

### What are the most critical needs to address in the Facilities Master Plan?

#### Summary

How people responded	Count
